Lighting

Our Lamps Collection brings light and atmosphere to outdoor spaces — powered entirely by the sun. Designed to charge by day and glow by night, each lamp offers a sustainable way to illuminate your evenings with warmth and style.

From subtle path lighting to statement pieces that define your space, these lamps combine thoughtful design with effortless functionality. No wiring, no fuss — just beautiful, ambient light wherever you need it.

Whether you're hosting under the stars or enjoying a quiet night outdoors, this collection adds the perfect finishing touch — lighting the way with elegance, ease, and eco-conscious charm.

OPERATION MANUAL

MK3

The module is equipped with two control buttons—Button 1 (Left) and Button 2 (Right)—along with a 3-LED indicator system for clear and intuitive operation.

Battery Level & Mode (Button 1 / Left Button)

Button 1 controls the power settings and displays the battery status.

First Press – Battery Indicator (shows for 3 seconds):

1. LEDs ON : Battery is well charged.
2. LEDs ON : Battery at a medium level.
3. LED ON : Battery is low but still usable.
4. LED blinking : Battery is critically low — recharge is required.

Subsequent Presses – Mode Selection:

Each press switches to the next operating mode, and the corresponding LED will briefly light up to confirm your selection:

- Left LED : OFF mode.
- Middle LED : AUTO mode (turns on automatically in low ambient light).
- Right LED : ON mode.

Brightness Selection (Button 2 / Right Button)

Button 2 adjusts the lamp's brightness.

1. First Press : Shows the current brightness level.
2. Additional Presses : Cycles through the brightness options (Low → Medium → High).

The lamp will briefly illuminate at the chosen level to confirm the setting.

Vincent Sheppard Solar-Powered LED Module (Maya, Mora, Tika Lamps/Lanterns)

These products feature a detachable solar module designed for both solar and quick outlet charging.

Automatic Mode Activation

- Press and hold the On/Off switch for 3 seconds until the light blinks twice.
- The module will now turn on automatically when ambient light becomes low (at dusk).

Automatic Mode Deactivation (Manual Mode)

- Press and hold the On/Off switch for 3 seconds until the light blinks once.
- This disables automatic operation, allowing manual control.

Charging

- The module fully charges in about 10 hours of direct sunlight
- For faster charging, use an electrical outlet—fully charges in approximately 5 hours.
